

Dear Sir, Mrs,

Przedsiębiorstwo Slusarsko-Budowlane Leszek Pluta was established in 1992 in Poland as a company based on private assets. Today it is well known and respected producer of glass-aluminum works based on YAWAL and REYNAERS systems. We specialize in manufacturing windows and doors, as well as building exteriors, winter gardens and piazzas. Our offer also includes balustrades, sliding doors (opened manually or automatically) and other structures which may be used in building industry. Everything is based on high-quality glass-aluminum techniques.

On May the 1st 2004 Poland finally has become a respected member of European Union. This fact gives us a great opportunity of cooperation with EU companies. It can be partnership related with aluminum-glass works, as well as totally different branches of business.

We are interested in representation or cooperation or creating new brand in many domains.

Advantages, which Przedsiębiorstwo Slusarsko-Budowlane Leszek Pluta can offer to future collaborators:

- *company with 13 years of irrefragable tradition and experienced employees,*
- *office equipped in full media connection (phone, fax, DSL internet connection) in 200 thousand city – Kielce – Capital of Swietokrzyskie province.*
- *Industrial building grounds – over 20 000 m²*
- *Production facility: 2 halls 400m² each, located in picturesque Swietokrzyskie Hills.*
- *Great accessibility of production place, as well as offices.*
- *Convenient company's location in southern Poland*
180 km (111,85 miles) from Warsaw
120 km (74,56 miles) from Krakow
130 km (80,78 miles) from Lodz
- *Our company has also potential of partnership in the field of purchasing and exporting big amounts of soft fruits, such as strawberries, cherries, red currants and raspberries.*

While considering possibilities of cooperation with us, please remark not only our potential, but also potential of our country. Good economical conditions, as well as lower than in other UE countries tax rates make Poland really attractive market. Costs of employment are also much lower.

Extended logistic systems
Comfortable connection.
Correspondence languages: Polish, German, English

We consequently put great effort to fulfill our Investors' requirements. We improve qualifications of our employees by taking part in all major conferences and classes organized by the greatest companies of building branch. We also regularly take part in technological conferences led by our commercial partners: YAWAL and REYNAERS aluminum systems' manufacturers.

The greatest indicator of quality of our projects as well as of our reliability are our references, given by our present and past Investors. They are the main factor, that puts us into the very front of glass-aluminum works' market.

Cooperation offer

Building branch

1. Glass-aluminum works export

Manufacturer

- windows: permanent, pivoting, opening, pivoting/opening, others
- doors: single, double, swing doors, others
- facades
- balustrades
- piazzas, winter gardens
- partition walls
- automatic slide doors
- shop facades

PSB Leszek Pluta runs entire production at its own assembly hall and mounts thermoinsulated and non-thermoinsulated constructions on buildings in following systems:

REYNAERS (Belgian system)

REYNAERS constructions are made from Al sections press-formed from ENA W 6060 (AlMgSi 0,5) alloy and then post-produced according to T66 requirements and with EN 573 norm.

Mechanical attributes of alloy fulfill the requirements of EN 755 part 2, hardness 70 in Brinell scale (according to DIN 1748 part 1). Dimensional tolerances correspond with DIN 17615 part 3.

Concept system 59: modern, three-chamber window-door system (material group 2.2 according to DIN 4108)

Concept system 68: modern, three-chamber window-door system (material group 2.1 according to DIN 4108)

Concept system 77: modern, three-chamber window-door system (material group 2.1 according to DIN 4108)

Concept system 77: modern, three-chamber window system (material group 1.0 according to DIN 4108)

CW 50: Al system used for cover walls (material group 2.1 according to DIN 4108)

RB 10: balustrade system

YAWAL (Polish system)

Base material for production of this system is Al alloy, fulfilling the following requirements:

- AlMgSi 0,5 alloy acc. to DIN 1725, AW 6060 acc. to EN
- F 22 alloy attributes acc. to DIN 1748
- Press-formed sections' tolerances up to DIN 17615 or DIN 1748 depending on requirements set on given sections.

PI 50: insulated window-door system (material group 2.1 acc. to DIN 4108)

PBI 50: non-insulated window-door system

PBI 40 ECONOMIC: non-insulated economic window-door system

FASADA 50: light, aluminum-glass cover walls' system

Construction dimensions according to Client's requirements

Additional info concerning YAWAL and REYNAERS systems can be found on the Internet: www.raynaers.com, www.yawal.com and on our webpage: www.pluta.pl

Colors: You can choose from the color palette consisting over 400 RAL colors in variety of glamour, satin, metallic shades.

Surface of sections is powder-sprayed or anodized.

Spraying made according to QUALICOAT standards. Anodizing made according to QUALANOD standards.

All kinds of glass: combined glass, safety glass, laminated glass, toughened glass, smoked glass etc.

We cooperate with top-producers of combined glass: Press-Glas, Celt-glas, Glaverbel, Glaspol.

Our constructions are equipped with fittings from: Sobinco, Roto, Geze, Dorma, Dr Hahn, Lob.

2. Coordination and execution of building works.

- a) Execution of building and finishing works.
- b) Doors, windows and aluminum-glass facades assembly.
- c) Assembly of automatically-opened doors, using drives from: Dorma, Geze, Besam.

3. Other branch

Cooperation with business Partner

- setting up a Company branch
- based on Joint-venture cooperation
- we can cooperate with another company, or set up a totally fresh business in all kinds of branches.
